AMERICAN BOOK PUBLISHING RECORD

Volume I, Number 7
for the month ending
July 31, 1960.

This cumulation from the listings in the PUBLISHERS' WEEKLY aims to be a complete and accurate record of American *book* publication in the four (or sometimes five) calendar weeks preceding its date of issue, "*book*" being defined in accordance with a Unesco recommendation as a non-periodical publication of 49 pages or more, not counting the covers. Smaller hardbound books and some pamphlets of fewer pages, but of special interest, are also listed.

Coverage extends to the books of all publishers on all subjects, including books printed abroad but "published" in the U.S.A. in the sense of being offered for sale here through a single designated agent. Omitted, however, are government or business publications not primarily intended for public distribution; and most serials.

The form of entry, the Dewey classification number, and the subject headings are as established by the Library of Congress for its catalog cards. The descriptive annotations have, wherever possible, been prepared after actual examination of the finished books, but are intended to place, not to judge the books.

Prices are shown except when not supplied by publisher or obtainable only on specific request, in which case the word "apply" is used. "Gratis" is used when the book is free. When not specified, the binding is cloth.

Measurements are in centimeters, the height being given before the width. Symbols and abbreviations whose meanings are not readily apparent are:

- ★— A translation from a foreign language.
‡— An imported publication.
T-Bk—A talking book (phonorecord).

 1. Bible. N. T.—Study—Text-books. 2. Religious education—Text-books for adolescents.
 Written to awaken the realization that Biblical studies call for as much thought and mental discrimination as any other subject, this book is designed for the 13-14 age group. A verse-by-verse commentary is provided on each passage, while the chapters themselves provide necessary background material, point the significance of the Biblical excerpts, and link them together into one continuous "Story of Jesus."

I. Electromagnetic theory. 2. Electrodynamics.

Develops a theory of electromagnetism and discusses the relation between circuit theory and field theory. The theory is developed in successive steps from the Lorentz force, the integral form of Maxwell's equations in free space, and macroscopic models of polarized and magnetized matter. Reviews the electromagnetism of moving bodies and the process of electro-mechanical energy conversion, introduces a power-series technique for analyzing quasi-static fields and quasi-stationary systems and covers many other topics.

1. Hydraulic machinery. 2. Hydraulic control. 3. Pneumatic machinery. I. Blackburn, John Francis. II. Title.

Presents the fundamentals of the operation of power-control systems in which the working media may be either liquids or gases. Methods described can be applied in both industrial and military fields, to automatic machinery, automobiles and other areas. Emphasis is placed on the conversion, transmission and control of fluid power under conditions for which gravitational effects are negligible.

1. Electric relays.

"... a theoretical monograph covering electrical protective gear. It is an exposition of the methods of theoretical analysis, which will enable the reader to apply and develop these methods by himself in practice." "The book is intended for those specializing in the field of relay protection—students, engineers and research workers." Professor Atabekov is an outstanding professional engineer in this field."

With complete revision of material pertaining to color television, stereo high-fidelity sound reproduction and semiconductor electronics.

CONFERENCE on the Properties of Elemental and Compound Semiconductors, Boston, 1959. TEC 621.3815

Properties of elemental and compound semiconductors; proceedings, edited by Harry C. Gatos. New York, Interscience Publishers [c.1960] xi, 340p. Includes bbls., illus., diagrs., tables. 24cm. (Metallurgical Society conferences, v. 5) 60-10585 8.50

1. Semiconductors—Congresses. I. Gatos, Harry C., ed.

"An important objective of the Conference was to accent certain aspects of semiconductor technology in which this field borders on or overlaps with modern metallurgy, since there is no doubt that advances in semiconductor technology and metallurgy are closely interrelated. . . . The material of this volume is grouped into five parts. I. Metallurgical and Chemical aspects; II. Solid State and Surface Reactions; III. Chemical and Lattice Defects; IV. Physical Properties and Device Applications; and V. The Role of Dislocations in Device Properties."

The writer's way in France. Philadelphia, University of Pennsylvania Press [c.1960] 447p. (Bibl. and bibl. notes) 22cm. 60-9757 5.00

I. French literature—Hist. & crit.

Relying on the findings of modern psychology and philosophy, Part I attempts to define the creative temperament of the literary artist. The book goes on to explore the development of this artist in the French culture, Part II tracing the fundamental variations of such temperament as expressed in themes, rhythms, moods, genres and styles. Part III attempts to make valid this theory of general criticism by actually analyzing a group of separate texts by Rimbaud and Proust. The author teaches French at Stanford University. He previously was the founding editor of *Yale French Studies*.

GOMEZ, Rosendo Adolfo *HIS* 980
Government and politics in Latin America. New York, Random House [c.1960] 128p. (Bibl. and Bibl. notes p.116-28) 19cm. (Studies in political science, PS32) 60-6198 pap., 95

1. *Spanish America—Politics*.
Latin America, so long dominated by the mother-countries who administered it for more than three centuries, was left a legacy of tradition-steeped colonial government when the new formed states were set up in the beginning of the 19th century. It was in revolt against this system that the forceful, shifting and ruthless governments of today as we know them, had their inception. The author of this book traces the growth of constitutions and governments and tries to explain them.

Keep up with every book on your special interest . . . with the

AMERICAN

BOOK

PUBLISHING

RECORD

covering—as they are published—original editions and reprints, hardbounds and paperbounds, tradebooks and textbooks, even important imports, serial publications and pamphlets

Make sure you miss nothing in your field—by following this comprehensive monthly record of virtually every new book published in the United States. Re-appearing in this new publication, complete with descriptive annotation, is every entry from the *Publishers' Weekly* Weekly Record—cumulated monthly, arranged by Dewey Decimal Classification, and indexed by author and title.

- *miss none of the books being published in your field*—of 15,000 books to be listed in 1960, it is unlikely that even half will get any pre-pub publicity!
- *save time by looking only under the subjects that interest you*—arranged by broad subject areas, the BPR enables you to miss nothing of interest from the current book output, without the need to scan everything!
- *take care of cataloging as you select*—each entry not only gives you full cataloging information taken directly from advance proofs of LC cards, but also LC card order numbers if you prefer to order cards from Washington!
- *check back on books you have already ordered from other selection media*—and find what Dewey number and subject headings LC assigned them. Or find price and description on books on which you have only the LC card.
- *simplify ordering*—each entry includes publisher, published price, even the addresses of less active publishers!
